Good Afternoon Susan,

Would you please provide me with the time frame the sampling team will be at the site to collect samples? Though this effort is investigative in nature--as you stated--and cannot accommodate the request to split samples, is it possible for CH2MHill to be present and observe? Because this site encounters a number of challenges that are sensitive in nature, CH2MHill would also like the opportunity to take photos or video tape the sampling effort, and flag or stake the sampled area, survey it in and collect samples after your team has completed it effort.

Your feedback and insight on this request is appreciated. Have a pleasant day.

Unfortunately, because this effort is investigative in nature, we will not be able to accommodate this request.

Sorry.

Subject: Tar Creek OU4: Sampling Effort

Good Morning Susan,

Thank you again for meeting with me and my Management to discuss your upcoming plans to perform sampling in areas that have been remediated. One item that I neglected to mention was our desire to split samples and have a CH2MHill representative present, to observe sampling efforts. This is solely to ensure the sampling approach used at the site is consistent with the methods used to remediate the property. For example, from a one acre grid, 5 composite samples are collected verses discrete sampling. We will be completing our 10 day work schedule on Wednesday (6/20/12), so a light crew will be on-site. So, if you could let EPA and Chuck Dougherty know your sampling schedule, arrangements can be made. Thank you in advance for your assistance. Have a pleasant day everyone.
